<u>Translation of Auditor's Report</u>

<u>Originally Issued in Arabic</u>

Independent Auditor's Report

To: The Shareholders of Fawry for Banking Technology and Electronic Payments S.A.E.

Report on the Separate Financial Statements

We have audited the accompanying separate financial statements of Fawry for Banking Technology and Electronic Payments S.A.E. which comprise the separate statement of financial position as of December 31, 2022 and the related separate statements of profit or loss, comprehensive income, changes in equity and separate cash flows statement for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Separate Financial Statements

These separate financial statements are the responsibility of the company's management. Management is responsible for the preparation and fair presentation of these separate financial statements in accordance with Egyptian Accounting Standards and in the light of the relevant Egyptian laws and regulations. This responsibility includes designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of these separate financial statements that are free from material misstatements, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these separate financial statements based on our audit. We conducted our audit in accordance with the Egyptian Standards on Auditing and applicable Egyptian laws and regulations. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the separate financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the separate financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on these separate financial statements.

Opinion

In our opinion, the separate financial statements referred to above present fairly, in all material respects, the separate financial position of Fawry for Banking Technology and Electronic Payments S.A.E. as of December 31, 2022 and of its separate financial performance and its separate cash flows for the year then ended in accordance with the Egyptian Accounting Standards and related Egyptian laws and regulations.

Report for Other Legal and Regulatory Requirments

The Company maintains proper books of accounts, which includes all that is required by the law and the status of the Company, and the separate financial statements are in agreement thereto.

The financial information included in the Board of Directors' Report is prepared in compliance with Law No. 159 of 1981 and its executive regulation thereto, and is in agreement with the Company's books of accounts.

Cairo, 6 March 2023

Kamel Magdy Saleh, FCA F.E.S.A.A. (R.A.A. 8510)

1. General information

Fawry for Banking and Payment Technology Services S.A.E. was established in accordance with the provisions of Law No. 159 of 1981 and its executive regulation, and was registered at the Commercial Register under No. 33258 on June 26, 2008, the commercial register has changed to 50840 in March 2011. The company reregistered at the commercial register under the No. 1333 on July 19, 2018.

The purpose of the company is to provide operations services specialized in systems and communications, management, operating and maintenance of equipment and computers networks services and internal systems of banks, networks, and centralized systems, establish operating systems for banking services through the internet, phone and e-payment services and circulation of secured documents electronically, taking into account the provisions of laws, regulations and decisions and provided that all the licenses necessary for pursuing these activities are issued. The duration of the company is twenty-five years from the Commercial Register date.

The separate financial statements of the company were approved in the board of directors meeting dated March 6, 2023.

2. Statement of compliance

The separate financial statements have been prepared in accordance with law Number 110 for on 2015 and with the Egyptian Accounting Standards, and applicable laws and regulations. The Egyptian Accounting Standards require reference to the International Financial Reporting Standards "IFRS" for events and transactions that have not been covered by the Egyptian Accounting Standards or legal requirements describing their treatments.

3. Basis of preparation of the separate financial statements

The separate financial statements are presented in Egyptian Pound (EGP), which is the functional and presentation currency of the Company.

The financial statements have been prepared in accordance with the Egyptian Accounting Standards and applicable laws and regulations on the historical cost basis except for the financial assets and liabilities measured at fair value, or at amortized cost, or cost according to the relative accounting standards.

The preparation of separate financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses, as well as the disclosure of contingent liabilities.

Investments in subsidiaries, associates, and joint ventures were presented in the attached separate financial statements on the basis of cost (excluding impairment, if any) which represents the company's direct equity interest not on the basis of the reported results and net assets of the investees.

Actual results may differ from these estimates. The critical accounting judgments and key sources of estimation uncertainty. (Note #4).

4. Critical accounting judgments and key sources of uncertain estimations

In the application of the company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources.

Those estimates and associated assumptions are based on management historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates therefore, these estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions of accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods (prospectively) if the revision affects both current and future periods.

5. Significant accounting policies

The principal accounting policies used in preparing the separate financial statements are set out below:

A. Investments in a subsidiaries

A subsidiary company is an entity including an unincorporated entity such as a partnership that is controlled by another entity (known as the parent). Control is achieved when the company has the right into variable returns through its contribution in the investee when exposed or entitled to variable returns and have the ability to effect that returns through its power on investee, the company control the investee when the company has the following:

- Has power over the investee.
- Is exposed or has rights to variable returns from its involvement with the investee.
- Has the ability to use its power to affects its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power including:

- The size of the Company's voting rights relative to the size and dispersion of the other vote holders.
- Potential voting rights held by the Company, other vote holders or other parties
- · Rights arising from other contractual arrangements and
- Any additional facts and circumstances that indicate that the Company has or does not have the
 current ability to direct the relevant activities at the time that decisions need to be made, including
 voting patterns at previous shareholders' meetings.

B. Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee.

Investments in associates in the separate financial statement are carried at cost. However, for those investments which are categorized as held for sale, they are carried at book value or fair value less any transactions costs that are directly attributable to selling these investments, whichever is less. The company does not account for investments in associates using the equity method in the attached separate financial statements as required by paragraph (17) from Egyptian Accounting Standard (18) If objective evidence arises which cast doubt that there is an impairment in the value of investments in associates at the financial position date, the carrying amount of the investment is reduced to its recoverable amount, and the loss is immediately recognized in the separate statement of profit or loss.

C. Investments in Joint ventures

A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity that is subject to joint control.

Investments in joint ventures in the separate financial statement are carried at cost. However, for those investments which are categorized as held for sale, they are carried at book value or fair value less any transactions costs that are directly attributable to selling these investments, whichever is less. If objective evidence arises which cast doubt that there is an impairment in the value of investments in Joint Venture at the financial position date, the carrying amount of the investment is reduced to its recoverable amount, and the loss is immediately recognized in the separate statement of profit or loss.

D. Foreign currencies

The Egyptian pound has been designated as the company's functional currency. Transactions denominated in foreign currencies are translated to the Egyptian pound using the effective exchange rates at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are re-valued at the end of each reporting period using exchange rates prevailing on that date.

The non-monetary items denominated in foreign currencies and measured at fair value, are translated at the exchange rates ruling at the date the fair value was determined. As for non-monetary items in other currencies which are measured at historical cost, they are not retranslated.

The gains and losses resulting from the translation differences are recognized in the separate statement of profit or loss in the period in which they arise except for the differences resulting from the translation of non-monetary assets and liabilities denominated at fair value, as their related translation differences are included in the changes in the fair value.

E. Fixed assets and depreciation

Fixed assets are stated in the separate financial position at historical cost, less accumulated depreciation and accumulated impairment losses, except for land, which is stated at cost less impairment. Cost of fixed assets includes expenditures that are directly attributable to the acquisition of the asset.

Subsequent costs are included in the assets carrying amount or recognized separately - as appropriate - only when it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably. Repairs and maintenance expenses are charged to separate statement of profit or loss during the financial period in which they have been incurred.

The gain or loss arising on the disposal or retirement of an item of fixed assets is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the separate statement of profit or loss.

The depreciation of these assets starts when they are ready for their intended use according to the same basis of depreciation applied with other fixed assets.

Depreciation is charged so as to write-off the cost of assets using the straight-line method, over their estimated useful lives, represented as follows:

| Assets description | Years |
|---------------------------------|-------|
| Building | 40 |
| Networks and servers | 4 |
| Point of sales machines | 1 - 4 |
| Computers and servers | 2 – 4 |
| Furniture and office equipment | 4 – 5 |
| Leasehold improvement * | 3 – 5 |
| Vehicles | 5 |
| Tools and equipment Super Fawry | 3 |
| Fawry Branches | 3 |

^{*} The useful lives are determined based on lesser of the remaining rent contract or the useful life of the asset Whichever is less.

F. Intangible assets

Intangible assets are stated in the financial position at historical cost, less accumulated amortization and accumulated impairment. Amortization is charged so as to write-off the cost of assets over their estimated useful lives, using the straight-line method.

The estimated useful lives, residual values and amortization method are reviewed at each year-end, taking into consideration the effect of any changes in useful lives estimate accounted for on a prospective basis.

Programs' licenses

Programs' licenses are stated at historical cost, less accumulated depreciation.

Amortization is charged so as to write-off the cost of assets over their estimated useful lives, using the straight-line method, which is usually 10 years.

Programs

Computer software programs are capitalized on the basis of the acquisition and utilization cost. These costs are amortized on straight-line basis over their estimated useful lives, which is usually between 4-10 years.

G. Impairment of non-financial assets

On the date of preparing the financial statements, the company determines whether there is an indication that an asset has been impaired. When the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset is considered to be impaired and is reduced to its recoverable amount. The impairment loss is recorded in the statement of profit or loss.

An impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized and it is limited so that, as a result of the impairment loss, the asset's recoverable amount or exceeds its recoverable amount. The carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years. The refund is recorded in the loss resulting from the impairment of the value in the statement of profits or losses

H. Related party transactions

Related party transactions carried out by the company are proven in the context of its normal transactions in accordance with the conditions set by the Board of Directors and on the same basis as dealing with third parties. These transactions are disclosed if they change from the normal transaction with a third party.

I. Revenues recognition and measurement

Applications sales

Revenue is measured at the fair value of the consideration received or receivable for the entity. Revenues recognized from the sold applications are recognized in the separate statement of profit or loss when the risks and rewards associated with the application are transferred to the buyer, and when there is a strong probability that the economic benefits and costs incurred or to be incurred in respect of the transaction can be measured reliably and when the entity does not retain any continuing managerial involvement right to the degree usually associated with ownership, and when the amount of revenue can be measured reliably.

Services

The revenue of rendered services is recognized as follows:

Transactions sales revenues

Revenues are recognized on accrual basis when the collection / settlement related to different streams of services is completed (balance recharge, bill payments, cash collections, etc.).

Subscription revenues

Subscription revenues are recognized in the statement of profit or loss on accrual basis.

Interest revenues

Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable until maturity.

Investment revenues

Dividends income from investments is recognized when the shareholder's right to receive these dividends is issued.

J. Operational costs

Operational costs include cash collection costs paid to multiple payment channels through which payments were made, including (merchants, banks, Egyptian Post Office, and several other authorities) and this is in accordance with executed contracts with each party separately. Operational costs also include the cost of applications sold, and the consumables of materials.

Operational costs are charged by the transaction's share of direct depreciation and amortization in accordance to transaction share basis compared to the estimated normal capacity, and if the normal capacity is not reached, the differences are charged to depreciation and amortization as part of general and administrative expenses.

K. Inventories

The inventory is measured at the date of the financial statements at cost or net realizable value whichever is less. The cost is represented in the purchase price; however, the realizable value is represented in the estimated selling value less selling and distribution costs.

L. Taxation

Deferred tax assets and liabilities are recognized on temporary differences between the assets and liabilities tax basis set by the Egyptian Tax Law and its executive regulations, and their carrying amounts per the accounting principles used in the preparation of the separate financial statements.

Income tax expense for the year is the sum of current income tax and deferred tax.

Current tax payable is calculated based on taxable profit of the year as determined in accordance with applicable local laws and regulations using tax rates enacted as of the separate financial statements date. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized, based on tax rates and tax laws that have been enacted at the separate financial statements date.

Deferred tax is recognized as an expense or revenue in the separate statement of profit or loss, except when it relates to items charged or credited directly to equity, in which case the income tax is also dealt with in equity unless those related items recognized in equity have affected taxable profit and calculation of current tax expense for the year, then the related deferred tax is recognized in the separate statement of profit or loss.

Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilized. These assets and liabilities are not recognized if the temporary difference results from goodwill or from the initial recognition of other assets and liabilities (other than those arising from business combinations) due to a transaction that did not have any effect on the taxable or accounting profit.

The carrying amount of deferred tax assets is reviewed at each financial position date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are accounted for using the financial position liability method and are reported in the financial position as non-current assets and liabilities.

M. Legal reserve

In accordance with law No. 159 for 1981 and the article of incorporation of the company, at least 5% should be retained and transferred from the net profit of the previous year to the legal reserve until the reserve reaches 50% of the issued capital After that, the company stops forming a reserve unless the reserve falls below 50% of the issued capital, and it is not distributable. The Company is required to resume transfer of net profit to the legal reserve once its balance falls below this percentage.

N. Cash and cash equivalents

Cash and cash equivalents are comprised of cash on hand, cash at banks, treasury bills with maturities less than three months and short-term demand deposits that are readily convertible to known amounts of cash.

O. Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the separate financial position date. When the effect of the time value of money is material, the amount of a provision shall be the present value of expected expenditures, required to settle the obligation. Where discounting is used, the increase in the provision due to the passage of time is recognized as finance expense in the separate statement of profit or loss.

P. The cash flows statement

The separate cash flows statement was prepared using the indirect method. For preparing the separate cash flows statement, cash and cash equivalents are comprised of cash on hand, current accounts, deposits at banks, and treasury bills with maturity less than 90 days.

Q. Short-term employee benefits

Short term employee benefits represent wages and salaries and social insurance contributions and paid annual leaves and bonuses (if they are accrued within 12 months of the end of the period) and non-cash benefits such as medical insurance for current employees.

R. Lease contracts

In March 2019, the Egyptian Standard No. (49) "Leasing Contracts" was issued to replace the Egyptian Standard No. (20) "Accounting rules and standards related to financial leasing operations" and the issuance of Law No. 176 of 2018 to regulate the financial leasing and factoring activity during August 2018 to replace Law No. 95 of 1995 Therefore, the company must apply the new Egyptian Standard No. (49) at the beginning of 2019 to contracts subject to the provisions of Law 95 of 1992 that were previously dealt with according to Egyptian Accounting Standard No. (20) according to the instructions mentioned in the periodic book No. 171 For the year 2019 issued on August 4, 2019, the companies Laguerre Lease and tenants under leasing contracts of non-bank financial firms and companies have restricted securities Egyptian Stock Exchange application of the standard lease financing no later than September 30, 2019 Therefore, the date shall be the first application in January 1, 2019.

1- Lease contracts subject to Law No. 95 of 1995 in which the company is a lessee

The company assesses whether a contract is or contains a lease at inception of the contract. The company recognizes a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases the company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative

Initial measurement of lease liability:

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the company uses its incremental borrowing rate for such liabilities.

Lease payments included in the measurement of the lease liability comprise:

- a. Fixed lease payments less any lease incentives;
- b. Variable lease payments that are depend on an index or rate, initially measured using the index or rate at the commencement date
- c. The amount expected to be payable by the lessee under residual value guarantees;
- d. The exercise price of purchase options, If the lessee is reasonably certain to exercise the options; and
- e. Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate

Subsequent measurement of lease liability:

The lease liability is subsequently measured as follows:

- Increase the carrying amount to reflect interest on the lease liability
- b. Reducing the carrying amount to reflect the lease payments made.
 The company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:
- -The lease term has changed or there is a change in the assessment of exercise of purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- -The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the leases payments change is due to a change in a floating interest rate, in which case a revised discount rate is used.
- A lease contract is modified and the lease modification is not accounted for as a separate lease

 If there is a change in future lease payments resulting from a change in the rate used to determine those
 payments or a change in the amounts expected to be payable under the residual value guarantee, the lessee
 must re-measure the lease liability to discount the adjusted lease payments using the same discount rate unless
 there is a change in lease payments resulting from a change in the variable interest rates, in this case the lessee
 must use a modified discount rate that reflects changes in the interest rate.

The cost of right-of-use assets includes:

- a. The initial measurement of the corresponding lease liability at the present value of the unpaid lease payments at that date. Lease payments are discounted using the interest rate stated in the contract if that rate can be easily determined. If this rate cannot be determined, the lessee must use the interest rate on the additional borrowings.
- b. Lease payments made at or before the start date
- c. Any initial direct costs
- d. Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognized and measured. The costs are included in the related right-of-use asset, unless those costs are incurred to produce inventory.

Subsequent measurement of Right of use assets

Right of use assets are subsequently measured at cost less:

- a. Accumulated depreciation and impairment losses.
- b. Any amounts resulting from revaluation of lease liability
- If the lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the company expects to exercise a purchase option, the related right-of use asset is depreciated from the commencement date over the useful life of the underlying asset. Other than the previous conditions the depreciation starts at the commencement date of the lease till the end of the useful life of the asset or end of lease contract whichever is earlier.
- The company applies EAS (31) to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the "Property, plant and equipment" policy.
- Variable rents that do not depend on an index or rate are not included in the measurement of the lease
 liability and the right-of-use asset. The related payments are recognized as an expense in the period in
 which the event or condition that triggers those payments occurs and are include in the line
 "administrative expenses" in the statement of profit or loss. Currently, the company does not have such
 variable rents.
- The standard permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease component as a single arrangement. The company has not used this practical expedient.

Sale and lease back transactions

If the transfer of the asset by the "Lessor" seller does not meet the requirements of Egyptian Accounting Standard 48 for accounting for it as a sale of the asset. The seller (the lessee) must continue to recognize the transferred asset and must recognize a financial obligation equal to the transfer proceeds and must account for the financial obligation by applying Egyptian Accounting Standard No. 47.

c. Financial instruments

Financial assets and financial liabilities are recognized when an entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial assets

Financial assets are recognized and derecognized on the "trade date" where the purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

A. Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortized cost less impairment loss:

 the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The subsequent measurement of all other financial assets is measured by fair value.

B. Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period.

The return on all debt instruments is recognized on an effective interest basis except as a financial asset at fair value through profit or loss where the yield is included in the net change in fair value.

C. Financial assets at fair value through other comprehensive income (FVTOCI)

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.
 Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs.
 Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in the investment revaluation reserve.

The cumulative gain or loss will not be reclassified to profit or loss on disposal of the investments.

The Company has designated all investments in equity instruments, that are not held for trading, as at FVTOCI on initial application of EAS No. (47).

Dividends on these investments in equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established based upon the Egyptian Accounting Standard No. (48) "Revenue from contracts with customers". Dividends earned are recognized in profit or loss and are included in the "Dividends income from investments" line item.

D. Financial assets at fair value through profit and loss (FVTPL)

Investments in equity instruments are classified as FVTPL unless the Company classifies the investment as FVTOCI upon initial recognition as FVTOCI.

Debt instruments - which do not meet the conditions of amortized cost - are measured at fair value through profit or loss, and debt instruments that meet the conditions of amortized cost - however the Company chooses to classify them at fair value through profit or loss - are also measured at fair value through profits or losses. A debt instrument may be classified upon initial recognition at fair value through profit or loss if that classification eliminates or significantly reduces a measurement or recognition inconsistency that may arise from the use of different bases in measuring assets or liabilities or in recognizing the resulting gains or losses. The Company has not classified any debt instrument at fair value through profit or loss.

Debt instruments are reclassified from the "amortized cost" classification to the "fair value through profit or loss" classification when the business model is changed such that the amortized cost terms are no longer applicable. It is not allowed to reclassify debt instruments that are classified upon initial recognition at fair value through profit or loss outside that classification.

Financial assets classified at fair value through profit or loss are measured at fair value at the end of each financial period, with any gain or loss resulting from re-measurement recognized in profit or loss. The net gain or loss - recognized in profit or loss for the period - is included in "other gains and losses" in the separate statement of comprehensive income.

The value is determined and the interest income from debt instruments classified at fair value through profit or loss is included in the net profit or loss referred to above.

Income from dividends resulting from investments in equity instruments classified at fair value through profit or loss is recognized in profit or loss when the Company has the right to receive dividends in accordance with Egyptian Accounting Standard No. (48) "Revenue from contracts with customers", and that income is included within the net profit or loss referred to above.

E. Impairment of financial assets

On a prospective basis, the company evaluates the expected credit losses for debt instruments measured at amortized cost and at fair value through other comprehensive income. The Company measures the expected credit losses and recognizes a provision for credit loss at the date of preparing the financial reports. The measurement of credit losses reflects the expectation: (i) a weighted fair amount determined by evaluating a range of outcomes, (ii) the time value of money, and (iii) reasonable and supportive information that is available without incurring undue cost or effort at the end of each reporting period of preparation of financial reports about past events, current conditions, expectations and future conditions. The Company applies a three-stage model of impairment, based on changes in credit quality since the first recognition, the financial instrument that has not been decreased by impairment at the first recognition is classified in the first stage. The expected credit losses for financial assets in the first stage are measured at an amount equal to the portion of the expected credit losses over the life that results from default events that are possible within the next 12 months or until the contractual maturity date, if more (up to 12 months expected credit losses) if the Company determines a significant increase in credit risk since the first recognition, the asset is transferred to the second stage and the expected credit losses are measured on the basis of the expected credit losses over the life, that is, until the contractual maturity date, but taking into account the expected advance payments, if any (expected credit losses over a lifetime). For a description of how the company determines when a significant increase in credit risk will occur. If the Company determines that a financial asset is credit-impaired, the asset is transferred to the third stage and the expected credit losses are measured as lifetime expected credit losses.

F. Derecognition of financial assets

The Company derecognize the financial asset from its books - only - when its contractual rights to the cash flows from the asset expire, or when the Company transfers the financial asset and all the risks and benefits associated with its ownership to another entity to a large extent.

If it turns out that the Company has neither transferred nor retained substantially all of the risks and benefits associated with ownership of the asset and continues to control the transferred asset, then the Company will recognize the right it held in the asset and with a corresponding liability representing the amounts that may have to be paid. If it turns out that the Company retains to a large extent all the risks and benefits of ownership of the transferred financial asset, then the Company continues to recognize the financial asset, provided that it also recognizes the gains it received as an amount borrowed as a security for that asset.

When a financial asset carried at amortized cost is removed from the books, then the difference between the carrying amount of the asset and the sum of the consideration received and the consideration still accrued is recognized in profit or loss.

Financial liabilities and equity instruments

A. Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

B. Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

The instrument is an equity instrument if, and only if, both conditions (a) and (b) below are met:

- a) The instrument includes no contractual obligation:
- i. to deliver cash or another financial asset to another entity; or
- ii. to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the issuer.
- b) If the instrument will or may be settled in the issuer's own equity instruments, it is:
- i. a non-derivative that includes no contractual obligation for the issuer to deliver a variable number of its own equity instruments; or

ii. a derivative that will be settled only by the issuer exchanging a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

C. Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method or at FVTPL.

A financial liability is classified as current liability when it satisfies any of the following criteria:

- It is expected to be settled in the entity's normal operating cycle
- It is held primarily for the purposes of trading.
- It is due to be settled within twelve months after the reporting period.
- The entity does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other financial liabilities are classified as non-current.

D. Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

clearing

Offsetting takes place between financial assets and financial liabilities, and the net amount is presented in the statement of financial position only when the company currently has a legally binding right to set off amounts and intends either to settle them on a net basis or to acquire the asset and settle the liability simultaneously.

Impairment of financial instruments and assets resulting from revenue contracts

The Company recognizes provisions for expected credit losses for:

Financial assets measured at amortized cost.

The Company measures impairment at an amount equal to lifetime ECL, except for the following, which are measured at 12-month ECL:

- Debt securities that are determined to have low credit risk at the date of the financial statements; And
- Other debt securities and bank balances in which credit risk (ie the risk of default over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for other receivables are always measured at an amount equal to lifetime expected credit losses.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the company's historical experience and credit rating, which includes forward-looking information.

The company assumes that the credit risk on the financial asset has increased significantly if the maturity date is more than 30 days.

The Company considers a financial asset to be in default when it is:

- It is unlikely that the Borrower will pay its credit obligations to the Company in full, without the Company resorting to such measures as obtaining the guarantee (if any); or
- The financial asset is more than 90 days past due.

The Company considers debt securities to be of low credit risk when its credit risk rating is equivalent to the globally understood definition of "investment grade". The company considers this to be Baa3 or higher depending on Moody's rating.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument. 12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating expected credit losses is the maximum contractual period during which the company is exposed to credit risk.

Measurement of ECLs

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

Expected credit losses are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at fair value through other comprehensive income are credit impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the company on terms that the Company would not consider otherwise.
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at fair value through other comprehensive income, the loss allowance is charged to profit or loss and is recognised in other comprehensive.

B. Effective interest method

Interest income and expense are recognized in the separate statement of profit or loss using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of a financial instrument to:

- the gross carrying amount of the financial asset; or -the amortized cost of the financial liability.
- When calculating the effective interest rate for financial instruments other than purchased or creditimpaired assets, the Company estimates future cash flows taking into account all contractual terms of the financial instrument, but not expected credit losses.

For purchased or credit-impaired financial assets, the credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs, fees, and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability

Amortized cost and gross carrying amount

The "Amortized cost" of a financial asset or financial liability is the amount for which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative depreciation using the effective interest method for any difference between the amount on initial recognition and the maturity amount, and for financial assets, adjusted for any provision for expected credit loss. The "gross carrying amount of a financial asset" is the amortized cost of a financial asset before adjusting for any provision for expected credit loss.

Calculating interest income and expenses

The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or financial liability. When calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit impaired) or to the amortized cost of the liability. The effective interest rate is adjusted as a result of periodic reassessment of the cash flows of floating rate instruments to reflect movements in market interest rates.

However, for financial assets that become creditworthy after initial recognition, the interest yield is calculated by applying the effective interest rate to the amortized cost of the financial asset. If the sub-asset is no longer creditworthy, then the interest yield calculation reverts to the gross basis.

For financial assets that were credit-impaired upon initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the asset. The calculation of interest income does not return to the gross basis, even if the credit risk of the asset has improved.

Government Grants

The incentives granted by the Central Bank of Egypt "CBE" for the deployment of points of sale devices under the CBE's initiative are recognized and recorded in the statement of profit or loss for the year when the grant amounts are approved by the CBE, in light of the Egyptian Accounting Standard (12) Government Grants, This is when all the procedures related to entitlement and collection of these grants have been fulfilled according to the conditions decided by the Central Bank of Egypt.

40. Financial instruments

Capital risk management

The Company manages its capital to ensure that it will be able to continue as going concern, in order to generate returns for shareholders, benefits for other stakeholders and to provide an adequate return for shareholders.

The capital structure of the Company consists of the capital paid by shareholders plus retained earnings. The Company reviews the capital structure of the Company regularly. As part of this review, the Company considers the cost of capital and the risks associated with each class of capital.

Financial risks factors

The company monitors and manages financial risks relating to its operations through analyzing the degree and magnitude of risk exposure. These risks include credit risk and liquidity risk. The company's overall risk management program focuses on managing the unpredictability of financial markets and seeks to minimize potential adverse effects on the company's financial performance.

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations on due dates resulting in financial loss to the company. Trade and notes receivables are monitored on an ongoing basis, and there are no delays included in these balances. Also, most of company's revenues arising from prepaid services, and the company is dealing with the financial institutions are only those that have high credit worthiness. The company performs a continuous monitoring of debtors in order to minimize credit risk to the minimal rate. The company's management collects cash in advance from the merchants, who represent the major portion of the transactions volume. Also, the bank current accounts are held at banks with high credit ratings.

The company reviews that risk and submits periodic reports to the senior management on those risks and the means of confronting their impact on the financial statements.

The maximum credit risk is analyzed as follows:

| EGP | December 31, 2022 | December 31, 2021 |
|----------------------------------|-------------------|-------------------|
| Cash and cash equivalents | 2 126 014 896 | 1 073 571 146 |

| Total | 4 346 185 564 | 2 763 830 326 |
| | | |

⁻Company uses specialized approaches in the calculation of ECL on its financial assets.

Liquidity risk

Ultimate responsibility for liquidity risk rests with the company's management, which has built an appropriate liquidity risk management framework for the management of the company's short, medium and long-term funding and liquidity management requirements. The company's management continuously monitors the forecast and actual cash flows and matches the maturity profiles of financial assets and liabilities.

The company uses specialized models in calculating the provision for expected credit losses on its financial assets.

The following are the remaining contractual dues for financial obligations, taking into account that the company does not have financial obligations with a return or maturity of more than a year:

| EGP | Less than one year | <u>Total</u> |
|----------------------|--------------------|---------------|
| 31 December 2022 | | |
| Non-interest bearing | 3 073 600 099 | 3 073 600 099 |
| Interest bearing | 229 391 220 | 229 391 220 |
| | 3 302 991 319 | 3 302 991 319 |
| 31 December 2021 | | |
| Non-interest bearing | 1 884 313 782 | 1 884 313 782 |
| Interest bearing | 471 905 913 | 471 905 913 |
| | 2 356 219 695 | 2 356 219 695 |

Foreign currency risk

Foreign currency risk is represented in foreign currency fluctuations in exchange rates affecting the Company's cash inflow and outflow in foreign currencies and also the exchange differences arising from translation of monetary assets and liabilities in foreign currencies. The company monitors foreign currency balances and prevailing exchange rates, and continuously minimizes deficit in foreign currency position, if any. Except for bank accounts in foreign currencies, most of the Company's assets and liabilities are denominated in Egyptian Pound, which minimize exposure to foreign currency risk.

Interest rate risk:

Interest rate risk represents fluctuations in interest rate which may have a negative impact on the results of operations and cash flows, management continuously monitors the changes in interest rates in the market. Interest rate risk is considered insignificant since the company does not has facilities with variable interest rates.

fair value measurement

Fair value measurements recognized in the separate financial position:

The following table provides an analysis of financial and non-financial instruments that are measured subsequent to initial recognition at fair value, grouped into Stages 1 to 3 based on the degree to which the fair value is observable.

- Stage 1: fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Stage 2: fair value measurements are those derived from inputs, other than quoted prices included within
 Stage 1, that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). However, it is not considered quoted prices as that included in stage 1.
- Stage 3: fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

| 2022 | Stage 1 | Stage 2 | Stage 3 | Total |
